Volume 29 Contents

January

Editorial
Forthcoming meetings of interest 1
Articles
Computer-assisted simulations of phosphofructokinase-1 kinetics using simplified velocity equations
H. Roy, J. Diwan, L.D. Segel, I.H. Segel 3
Developing experimental design and troubleshooting skills in an advanced biochemistry lab
L.M. Roberts 10
Structural determinants of mini-protein stability
F. Polticelli, G. Raybaudi-Massilia, P. Ascenzi 16
Laboratory exercises
An approach to the critical assessment of the experimental conditions in practical molecular biology: isolation of plant DNA
A. Scarafoni, M. Duranti 21
Features
Problem based learning
Editorial: PBL curricula versus PBL courses
H.B. White 24
Multimedia in BMB Education
Editorial: Grappling with the globalisation of on-line education
G.R. Parslow 26
Websites of note 28
New structures
Time-resolved X-ray crystallography: uncovering reaction intermediates in biochemical processes
F. Polticelli, M. Bolognesi, P. Ascenzi 31
Book reviews
Protein structure prediction Methods and protocols by D.M. Webster (Ed.)
Reviewed by K. Giles 33
Fundamentals of enzymology (Third Edition) by N.C. Price
Reviewed by P.A. Frey 34
Basic techniques in molecular biology Stefan Surzycki
Reviewed by A. Uzman 36
Structure and Mechanism in Protein Science. A guide to Enzyme Catalysis and Protein Folding by A. Fersht.
Reviewed by J.L. Howland 38
Proteins, enzymes, genes, the interplay of chemistry and biology by J.S. Fruton
Reviewed by F. Vella 39
Biochemistry and molecular biology of plants by Buchanan, Gruissem and Jones
Reviewed by T.W. Short 40
Notice of forthcoming meetings 39
Instructions to Authors I

March

Editorial
Picturing our world. M. O'Leary 41
IUBMB-Nicholson metabolic pathways charts.
D.E. Nicholson 42
Using the protein folding literature to teach biophysical chemistry to undergraduates.
S. Anthony-Cahill 45
Student reactions and learning: evaluation of a biochemistry course that uses web technology and student collaboration.
H.A. Traver, M.J. Kalsher, J.J. Diwan, J. Warden 50
Water: its importance to life.
M.F. Chaplin 54

Fluorescence spectroscopy in biochemistry: teaching basic principles with visual demonstrations.
J.C. Croney, D.M. Jameson, R.P. Learmonth 60
The AAA amino acid list: a mnemonic derivation of the structures and properties of the amino acids.
V.A. Mezl 66
Laboratory Exercises
Analysis of the tetranucleotide polymorphic HUMTH01 microsatellite.
I. Lajoie-Mazenc, B. Couderc 71
On the importance of controls in enzyme assays — an odd example.
S. Sudarshana, S. Noor, N.S. Punekar 76
Features
Problem Based Learning
Editorial: What makes PBL tutors different
H.B. White 79
Problem-based learning in biochemistry at Ziauddin Medical University, Karachi, Pakistan.
A. Jaleel, M. Ataur Rahman, N. Huda 80
Multimedia in BMB Education
Editorial: The era of professional biochemical educators with multimedia skills
G.R. Parslow 85
Websites of note 86
Book reviews
Chemistry for the life sciences by R. Sutton, B. Rockett and P. Swindells
Reviewed by E.J. Wood 89
Tachenwörterbuch der biochemie/pocket dictionary of biochemistry
Reviewed by P. Reuter E.J. Wood 92
Notice of forthcoming meetings 91
Instructions to Authors I

May

Editorial
Assessment of educational innovation.
T.S. Woodin 93
Discussion
Modern biochemistry in one semester.
A. Uzman 95
Articles
Using the separation of poster handouts into sections to develop student skills.
M.J. Costa 98
The free energies of metabolic reactions (ΔG) are not positive.
R.A. Edwards 101
Laboratory exercises
What makes a good laboratory experiment?.
E. Bell 104
Bringing the brain into the test tube: an experiment illustrating the effect of ethanol on nerve terminal viability.
R.A. Cunha 105
Using a classical method of vitamin C quantification as a tool for discussion of its role in the body.
P. Ciancaglini, H.L. Santos, K.R.P. Daghastanli, G. Thedei Jr. 110
Features
Problem based learning
Simple analogies for teachers and students new to PBL.
H.B. White 115
Multimedia in BMB education
A disability does not have to be a handicap.
G.R. Parslow 116
Websites of note.
G.R. Parslow 117
Biotechnology education

Biotechnology: en route to filling the proto-employee pipeline of industrial biology and the life science industries.
S. Dahms 121
New structures
Truncated hemoglobins: trimming the classical 'three-over-three' globin fold to a minimal size. M. Milani, A. Pesce, M. Bolognesi, P. Ascenzi 123
Book reviews
Molecular Cell Biology (4th edition) by H. Lodish, A. Berk, S. L. Zipursky, P. Matsudaira, D. Baltimore and J. Darnell
Reviewed by A. Uzman 126
Physical biochemistry: principles and applications by D. Sheehan
Reviewed by E.J. Wood 128
Introduction to protein architecture by A. M. Lesk
Reviewed by J. S. Richardson 129
Proteome research: mass spectrometry — principles and practice by P. James (Ed.)
Reviewed by E.J. Wood 130
From genome to therapy: integrating new technologies with drug development by G.R. Bock, D. Cohen and J. A. Goode (Eds.)
Reviewed by C. K. Mathews 131
A guide to protein isolation by C. Dennison
Reviewed by E.J. Wood 132
Cell, Tissue and Disease. The Basis of Pathology (3rd Edition) by N. Woolf and W.B. Saunders
Reviewed by F. Vella 133
Notice of forthcoming meetings 134
Instructions to authors I

July

Obituary of Alan Haskell Mehler. 1922–2001. F. Vella 135
Editorial
Content and process in biochemistry and molecular biology education.
J.G. Voet 136
Articles
Conventional teaching remains effective in teaching medical biochemistry in BPKIHS, Nepal, although students enjoy supplementary computer teaching.
B.C. Koner, M. Lamsal, B.D. Banerjee, N. Baral 137
Metabolic pathways: does the actual Gibbs free-energy change affect the flux rate?.
J.C. Aledo 142
Laboratory exercises
The determination of chitinase activity of grapes: an introductory enzyme assay.
N.D. Byrne, M. Duxbury, N. Sharpe 144
Designer metabolic pathways in the teaching laboratory.
M.P. Gillett 147
Features
Problem based learning
The problem-based learning page of biochemical education 1993–2000.
C.A. Smith, H.B. White 152
Multimedia in BMB education
Providing the best for free—courses from MIT.
G.R. Parslow 154
Websites of note
G.R. Parslow 155
Meeting report
Using technology for teaching biochemistry/molecular biology—examples from the field
T.S. Woodin, C. Rhodes 158

Virtual laboratories enhance traditional undergraduate biology laboratories.
D. Raineri 160
Development and evaluation of virtual labs and other interactive learning tools.
D. Liu, S. Amagai, A. Cordon 163
The biology student workbench project.
E. Jakobsson 165
Integrating bioinformatics into undergraduate courses.
S. Cooper 167
New Structures
Human rhinovirus 3C protease: a cysteine protease showing the trypsin(ogen)-like fold.
M. Bolognesi, A. Spallarossa, P. Ascenzi 169
Book reviews
Membrane transport: a practical approach by Stephen A. Baldwin (Ed.);
Reviewed by K. Cornely 173
Protein–ligand interactions: structure and spectroscopy by Stephen E. Harding
and Babur Z. Chowdhry (Eds.),
Reviewed by J. Zimmerman 1 74
The way of the cell: molecules, organisms and the order of life by Franklin M. Harold,
Reviewed by J. Boyle 175
Proteolytic enzymes: a practical approach by R. Beynon and J.S. Bond (Eds.);
Reviewed by A.J. Wolfson 176
Monitor
Notice of forthcoming papers 178
Instructions to authors I

September

Discussion
Pentose phosphate pathway(s) minimaps. D.E. Nicholson 179
Article
Myoglobin: a pseudo-enzymatic scavenger of nitric oxide.
P. Ascenzi, M. Brunori 183
A communication requirement within a biochemistry course.
J. Zimmerman 186
A Biochemistry of Human Disease course for undergraduate and graduate students.
R.H. Glew, D.L. VanderJagt 188
Revision bingo.
C.J.R. Willmott 193
Laboratory exercises
Aminotransferase from insect cells.
H. Erwin, G. de Ridder, P.A. Barton 196
Kinetic analysis of glucose-6-phosphatase: an investigative approach to carbohydrate metabolism
and kinetics.
M.A. Wallert, J.D. Foster, D.A. Scholnick, S.M. Olmschenk, B.J. Kuehn, J.J. Provost 199
Features
Problem based learning
PBL, Faculty Development, and Institutional Change.
H.B. White 204
Biotechnology education
Program for Education and Research in San Diego State University
The US biotechnology industry: the importance of workforce quality in the maintenance of corporate
competitive advantage.
A. Stephen Dahms 206
Book reviews
Modern Experimental Biochemistry (Third Edition)
by R Boyer
E.J. Wood 209

DNA-Protein Interactions: Principles and Protocols (2nd edition) by Tom Moss,
P. Lu 210
Protein Purification Applications. A Practical Approach (2nd edtion) by S. Roe,
R. Boyer 211
Protein–Protein Recognition by Colin Kleanthous
P.N. Campbell 211
Unraveling DNA—Molecular Biology for the Laboratory by M.R. Winfrey, M.A. Rott and A.T. Wortman
A. Uzman 213
Basic Mathematics for Biochemists Second edition by Athel Cornish-Bowden
John Lydon 214
Stereochemistry by D.G. Morris
E.J. Wood 216
Mitochondria, Immo by E Scheffler
J.L. Howland 216
Metabolism at a Glance 2nd edition by J.G. Salway
K.M. Abu-Salah 217
Improving Sports Performance in Middle and Long-Distance Running: A Scientific Approach to Race Preparation by J.L. Fallowfield and D.M. Wilkinson
E.J. Wood 217
Notice of forthcoming meetings 219
Instructions to authors I

November

Editorial
BAMBED to become an ASBMB/IUBMB joint venture in Jaunuary, 2002
J.G. Voet 221
Discussion
The new biochemistry: in praise of alternate curricula
R.S. Feldberg 222
Articles
Dialogues as teaching tools in the biochemical sciences
E.S. Roberts-Kirchhoff, M.L. Caspers 225
Use of the web to provide learning support for a large metabolism and nutrition class
D.C. Henly, A.E. Reid 229
Laboratory exercise
A laboratory exercise designed to teach medical students about reverse-transcription polymerase chain reaction
M.J. Fay, N. Chandar, S.M. Viselli 234
Restriction enzyme mapping of bacterial urease genes: using degenerate primers to expand experimental outcomes
K.E. Reed 239
The pentose phosphate pathway in the yeasts *Saccharomyces cerevisiae* and *Kloeckera apiculata*, an exercise in comparative metabolism for food and wine science students
C.C. Steel, P.R. Grbin, A.W. Nichol 245
Electrophoretic transfer technique to detect and identify amylases in polyacrylamide gels
V.H. Mulimani, S. Thippeswamy 250
Features
Problem based learning
Problem-based learning and the power of stories
H.B. White 255
Biotechnology education
Careers in the biotechnology industry: what do our students do in the industry and what degrees and training are necessary? A.S. Dahms, J. Bourque 257

Multimedia in BMB education
Better assessment to improve teaching and learning and vice versa
G.R. Parslow 262
Websites of note
The biochemical journal online
G.R. Parslow 264
Book reviews
Biochemistry and Molecular Biology (Second Edition) by W.H. Elliott, D.C. Elliott
E.J. Wood 266
Methods in Molecular Biology, Vol. 132, Bioinformatics Methods and Protocols by S. Misener and S.A. Krawetz
D. Westhead 267
Stem Cell Biology, by D.R. Marshak, R.L. Gardner and D. Gottlieb
E.J. Wood 268
Teaching and Learning Materials and the Internet (Third Edition) by Ian Forsyth
E.J. Wood 268
Principles of Biochemistry (Third Edition) by H.R. Horton, L.A. Moran, R.S. Ochs, J.D. Rawn and K.G. Scrimgeour
E.J. Wood 269
Biological Thermodynamics by Donald T. Haynie
F. Vella 271
Biological Thermodynamics by Donald T. Haynie
Graham Parslow 272
Cases in Biochemistry by Kathleen Cornely
E.J. Wood 273
Metal Ions in Biological Systems, Volume 36, Interrelations Between Free Radicals and Metal Ions in Life Processes
by A. Sigel and H. Sigel
W.H. Bannister 274
The Age of the Molecule (mulitiple authorship)
E.J. Wood 274
Notice of forthcoming meetings 276
